

# Master your go-to recipe to stay cool

We'll provide you the right ingredients

Fresh ingredients are crucial to any successful recipe. When shipping with Sealand - A Maersk Company we will ensure your fruits and vegetables arrive in the freshest state possible. Our refrigerated solutions are designed to optimize product outturn upon arrival at destination. Trust us as your fresh logistics partner to help you deliver your recipe for success with our key ingredients: Expertise, Network, Technology and Care.

# Your Cold-Chain Logistics Partner

We are happy to be your trusted logistics partner in the Americas and help you meet market demands, advance your distribution, and grow your business. When you partner with Sealand, we provide you with the highest quality level of refrigerated transportation, competitive transit times, innovative equipment technology like RCM, and unmatched in-market expertise.

## The right mix of ingredients to keep you and your cargo cool

1

### Expertise

Sealand offers trained and dedicated reefer specialists throughout the Americas, from Customer Services representatives, Sales executives, and in-market reefer technicians who offer seminars and quality-improvement programs.

2

### Network

Sealand's vast network gives you fast and seamless access to markets with the most-modern and largest fleet of refrigerated equipment in the Americas.

3

### Equipment & Technology

Your cargo deserves to reach your customers in ideal conditions. That's why we provide you with the world's smartest containers, packed with innovative technologies such as Remote Container Management (RCM), Quest II, Starcare™ Controlled Atmosphere and SuperFreezer. Our containers ensure that your cargo travels in the perfect atmosphere – from door to door.

4

### Care

Our passionate teams can ensure prompt support whenever you need it. We have an entrepreneurial spirit – just like you – and we are ready to help you propel it. We strive to understand every relevant detail of your business. We are your neighbor, speak your language and know your market.

### Expert Tip: Cargo Temperature

Pre-cool cargo before loading. Set unit at carrying temperature, no lower (lower set point will not expedite cooling process and may damage cargo). Set fresh-air vents as required.
